<b>CH 504</b>	3.00	HERITAGE ECONOMICS								
Laura Prota			Thu	02:05 PM	05:05 PM	01/20/2025	05/07/2025			

</a>

This course provides students with a foundational understanding of the ways in which economic analysis can be applied to cultural institutions and heritage resources. The course will enable practitioners in cultural- and heritage-related fields to apply economic reasoning to issues in their fields and to become well-informed and critical consumers of economic analysis.

3 credits.

<b>CH 505</b>	1.00	SUSTAINABLE CONSERVATION								
Francesca Guiducci				00:00 AM	00:00 AM	01/20/2025	05/07/2025			

This course will examine the theory and practice of sustainable conservation. The course will focus on issues that form the current debate on conservation such as documentation and information management, values and interest groups and stakeholder engagement as a form of site preservation. The course will also provide students with the necessary tools and set of examples for selecting sites for preservation, with a focus on preventive conservation. Reactive intervention is not sufficient to balance the long-term preservation of resources with the contemporary needs of users, and holistic approaches are currently being theorized, problematicized and explored worldwide. Preventive conservation and maintenance are two approaches that greatly facilitate the responsibilities of the manager, reducing the need for costly, labor-intensive conservation and restoration projects. Students will also learn practical methods for the physical conservation of different categories of cultural resources and will master a technical vocabulary adequate to communicate with conservation specialists.

1 credit.
